Summary

Final-year B.E. Computer Science student with strong skills in software development, web technologies, and problem-solving. Eager to contribute to innovative projects and grow within a dynamic organization.

Education

Bachelor of Engineering (B.E.) – Computer Science and Engineering

College Name	– Basaveshwar Engineering College , Bagalkote
CGPA	– 8.50/10 (up to 7th semester)
12th Grade	–SKR PU College ,Gangavathi (2022 – 94%)
10th Grade	– Govt High School Basapattan (2020 – 88.96%)

Internship Experience

Software Engineering Intern - Tiranga Aerospace Pvt. Ltd.
Jan 2026 – Present

- Working on automation tools for government tender tracking and data extraction.
- Developing Python-based scripts using Selenium for web scraping and data processing.
- Designing systems to monitor tender updates and send automated email notifications.
- Gaining hands-on experience in real-world software development, debugging, and deployment.

Academic Projects:

AI Powered Youtube Video Summerization and Notes and Quiz Generation . *(MajorProject)*

- Developed a Flask-based web application that generates summaries, notes, and quizzes from educational YouTube videos.
- Implemented audio extraction using yt-dlp and speech-to-text transcription using faster-whisper.
- Used HuggingFace transformer models to generate concise summaries from transcripts.
- Designed an automated quiz generator producing MCQs, fill-in-the-blanks, and true/false questions.
- Enabled result visualization in the UI and export of notes and quizzes as JSON/TXT files.

Technologies: Python, Flask, HuggingFace, faster-whisper, yt-dlp, NLP, REST APIs

Parking Management System *(MiniProject)*

- Designed and developed a full-stack parking system using Flask, MySQL, and Python.
- Implemented role-based authentication for users and administrators.
- Developed real-time slot booking and availability tracking modules.
- Integrated dynamic billing and PDF invoice generation.
- Added admin tools for notifications, slot management, and system configuration.

Technologies: Python, Flask, MySQL, HTML, CSS, JavaScript, pdfkit

Diabetes Prediction using Machine Learning

- Implemented multiple machine learning algorithms to predict diabetes using the Pima Indians dataset.
- Compared models including Logistic Regression, KNN, SVM, Decision Tree, Random Forest, and Gradient Boosting.
- Achieved highest accuracy of 83% using Gradient Boosting Classifier.
- Performed data preprocessing, feature scaling, and model evaluation using accuracy metrics.

Technologies: Python, Scikit-learn, Pandas, NumPy, Matplotlib

AI-Powered Resume Analyzer

- Developed an AI-based tool that analyzes resumes and provides structured feedback.
- Extracted text from PDF and Word files using python-docx and pdfplumber.
- Integrated LLM APIs (OpenAI/LLaMA) to evaluate content clarity, skills, and experience sections.
- Generated role-specific improvement suggestions for targeted job applications.
- Designed the system to be easily extendable into a web-based application.

Technologies: Python, OpenAI API, LLMs, pdfplumber, python-docx, Flask/FastAPI

Technical Skills

- Programming Languages: Python, C, SQL
- Web Development: HTML, CSS, JavaScript, Flask, Automation tool(Selenium)
- Database: MySQL
- Core Concepts: Database Management Systems (DBMS)
- Tools & Platforms: Git, VS Code, Jupyter Notebook ,Cursor and Other AI tools

Languages

- English
- Kannada
